Axiom Rainscreen Systems

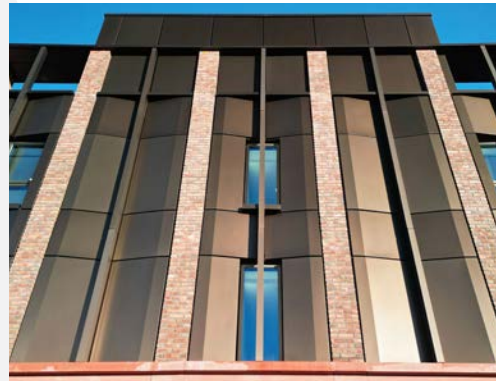

Innovative Rainscreen Solutions for Tomorrow's Architecture

Axiom is a range of high-performance aluminium rainscreen systems designed for modern façades. Engineered for durability and aesthetics, Axiom panels deliver exceptional weather resistance, structural performance, and a sleek architectural finish. Available in four distinct systems to suit diverse design and installation requirements.

Axiom X

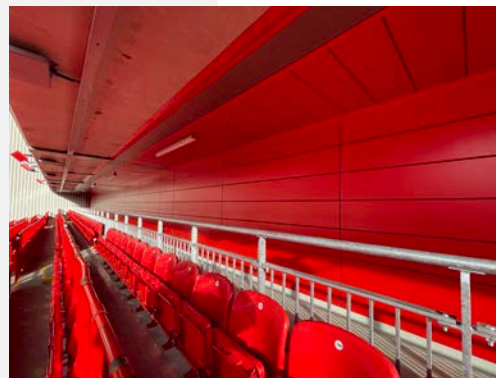

Axiom Y

Axiom RF

Axiom IP

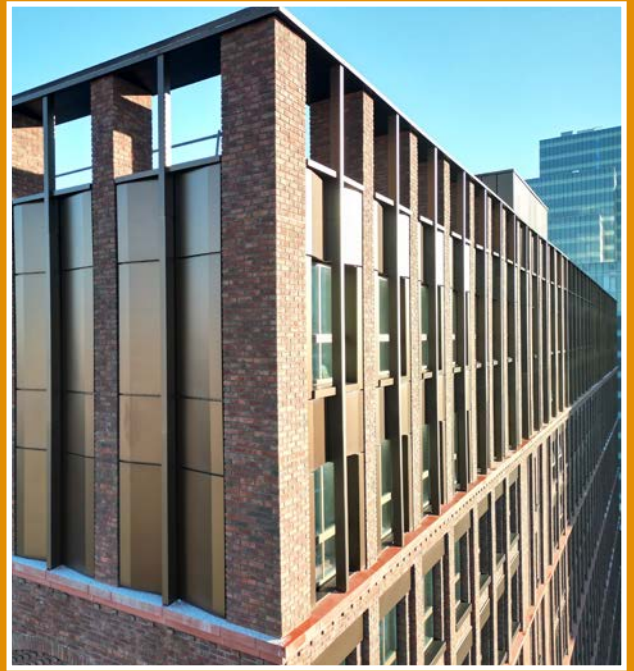

Fabrication

Every Axiom panel begins with precision engineering. Using high-grade aluminium, our fabrication process ensures dimensional accuracy and structural integrity for long-term performance.

Advanced CNC technology and automated forming techniques allow us to deliver consistent quality across all systems—whether hook on, interlocking, recessed, or custom.

From raw material to finished component, every stage is controlled to meet strict tolerances, guaranteeing panels that fit perfectly and perform flawlessly.

Testing

Axiom systems have undergone rigorous CWCT testing to meet and exceed industry standards. Each panel has been evaluated for weather resistance, impact resistance, and structural integrity. Our commitment to quality ensures that every product delivers reliable protection and durability in real-world conditions.

Finishing

We offer a wide range of finishes to complement any architectural vision. From premium powder coatings to anodised and specialist treatments, every finish is applied with precision for lasting beauty and performance. Our finishing process not only enhances aesthetics but also provides superior resistance to corrosion and environmental wear.

Axiom X

Horizontally Laid Hook-On Secret Fix Rainscreen System

Why Choose Axiom X

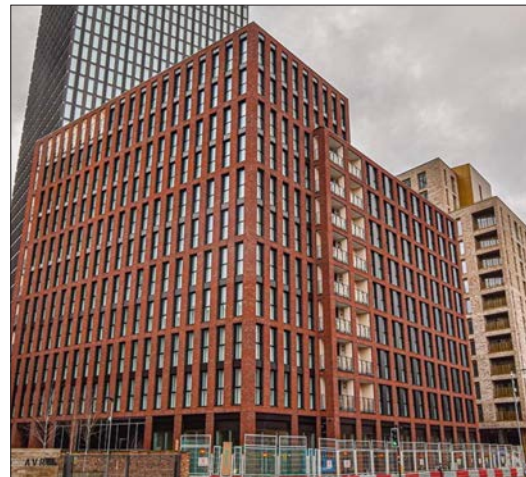

Axiom X is a precision-engineered aluminium rainscreen system designed for speed, strength, and style. Its hook-on secret fix design ensures a seamless façade with no visible fixings, delivering a clean, contemporary aesthetic for modern architecture.

Key Features

- Hook-On Secret Fix: Creates an uninterrupted surface for a sleek finish
- Rapid Installation: Panels are designed for efficient, secure mounting
- Durable Aluminium Construction: Lightweight yet robust for long-term performance
- Versatile Finishes: Available in anodised, powder-coated, and specialist treatments
- Compliance Assured: Tested for fire safety, weather resistance, and structural integrity
- Integrateable: Axiom X and Y can be used together to create a portrait and landscape facade.

South Parade, Leeds

Port Street, Manchester

Axiom Y

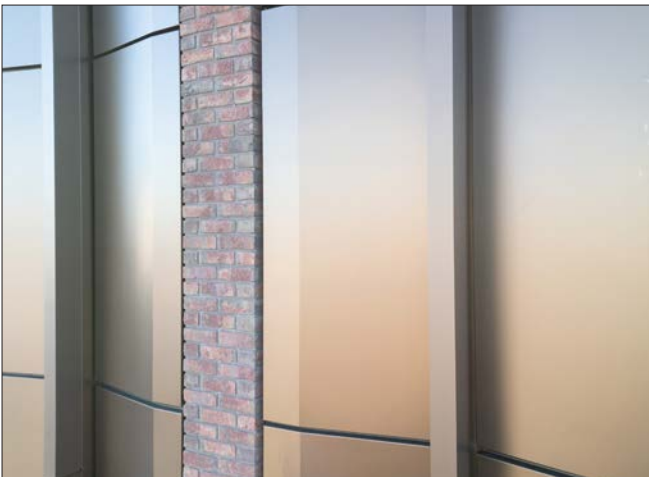

Vertically Laid Hook-On Secret Fix Rainscreen System

Why Choose Axiom Y

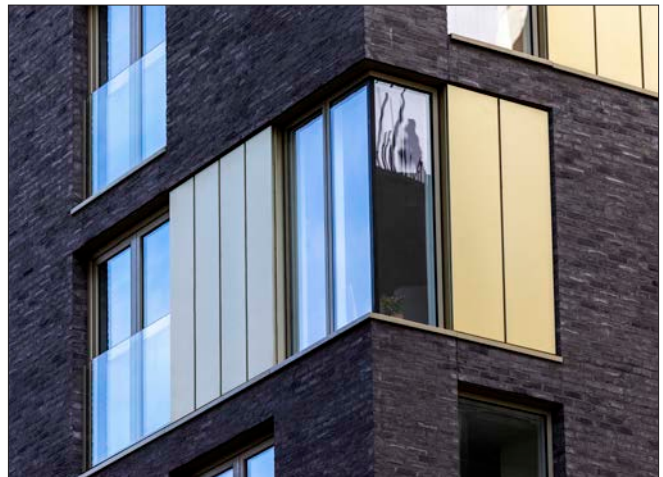

Axiom Y is designed for projects that demand bold architectural expression. Its hook-on secret fix design creates dynamic shadow lines and a flawless façade, combining strength with visual impact. Perfect for high-profile commercial and residential developments.

Key Features

- Hook-On Secret Fix: Creates an uninterrupted surface for a sleek finish
- Rapid Installation: Panels are designed for efficient, secure mounting
- Durable Aluminium Construction: Lightweight yet robust for long-term performance
- Versatile Finishes: Available in anodised, powder-coated, and specialist treatments
- Compliance Assured: Tested for fire safety, weather resistance, and structural integrity
- Integrateable: Axiom Y and Axiom X can be used together to create a portrait and landscape facade.

House of Social, Manchester

Exchange Court, Manchester

Axiom RF

Recess Fix Rainscreen System

Why Choose Axiom RF

Axiom RF offers refined detailing with its recessed-fix design, delivering crisp joint lines and a premium finish. Engineered for precision and performance, it's the perfect choice for façades where subtle sophistication matters.

Key Features

- No visible fixings as the fixings are contained within the recess.
- As the panels are fully mechanically fixed there is no chance of movement in high winds and more resistant to tampering or accidental dislodgement.
- Unique profiled panel returns allow for a rapid, accurate installation offering a 'stacking effect', a favourite by installers.
- Bottom of the panels remain open to allow appropriate ventilation and drainage of any residual water, allowing the façade to breath.
- Versatile finishes: Available in anodised, powder-coated, and specialist treatments (textured /perforated)
- Compliance Assured: Tested for fire safety, weather resistance, and structural integrity

Radyr School, Cardiff

Sandwell College, Birmingham

Axiom IP

Interlocking Plank Rainscreen

Why Choose Axiom IP

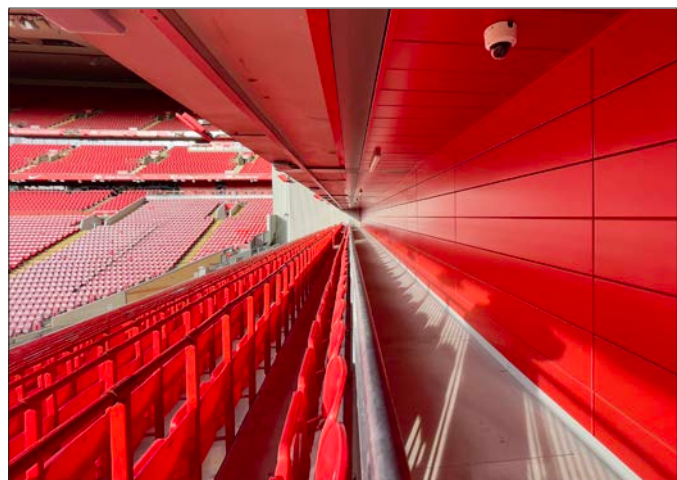

Axiom IP combines streamlined installation with striking visual depth. Its secret fix interlocking plank design ensures secure fit and superior rigidity while maintaining a clean, contemporary appearance.

Key Features

- No visible fixings as the fixings are contained within the recess.
- As the panels are fully mechanically fixed there is no chance of movement in high winds and more resistant to tampering or accidental dislodgement.
- Versatile finishes: Available in anodised, powder-coated, and specialist treatments (textured / perforated)
- Compliance Assured: Tested for fire safety, weather resistance, and structural integrity
- Extremely versatile, Axiom IP can be installed vertically, horizontally or as a soffit system.
- Robust, engineered interlocking joint detail and folded end returns offers contractors the confidence in the panels ability to perform under harsh conditions when compared to traditional planks.
- Various joint widths are available, ranging from closed, to 10mm or 20mm giving architects the freedom to choose.

Market Walk, Chorley

Anfield Stadium, Liverpool

▣▣ Axiom's rainscreen system transformed our building façade. The precision engineering and flawless finish exceeded our expectations. Installation was quick, and the result is stunning—modern, durable, and low-maintenance. ▣▣

Project Manager, Commercial Development

▣▣ We chose Axiom for a high-profile residential project, and it was the best decision. The panels delivered exceptional weather resistance and a premium look that impressed both clients and residents. Outstanding quality and support throughout. ▣▣

Lead Architect, Residential Scheme

▣▣ From design to delivery, Axiom provided a seamless experience. Their systems are versatile, easy to install, and meet all compliance standards. The façade now stands out as a landmark feature in the city. ▣▣
